**10. Troubleshooting:**

- If you want to pass the camera wires through the wall behind the base plate, drill a 22mm diameter hole in the midpoint between the screw holes.
- Drill 3 holes (4.5mm diameter) and hammer the expansion plugs (included) into the holes as needed.
- Mark the position on the wall using the camera base plate as a template, making sure the unit is fixed firmly on the wall or ceiling.
- Pass the camera wires through the cable guide of the base plate or through a hole in the wall or ceiling directly behind the base plate.
- Loosen the tamper-proof screws with the wrench key (provided).
- Make sure the unit is fixed firmly on the wall or ceiling.
